I'd like to take this opportunity to welcome everyone to Checkers/Fullblood Perfection Sale. I'd also like to thank Brian and staff at Bouchard Livestock for inviting us to be part of this prestigious event. I'd also be remiss if I didn't thank Rob and Deanne Young and family for looking after our cattle during their pre-sale Western stay.

We allowed Brian to pick from the entire herd and in doing so I feel he picked some of our top end females right from the *heart* of our program. We are bringing four live lots, a semen lot and an embryo lot, which should provide something for everyone! All the cattle are on a modified live vaccine (Pyramid 10) and a blackleg/clostridia (Tasvax 8) program along with parasite control (Dectomax).

Please feel free to contact us ahead of the sale and I look forward to visiting with you in Red Deer. On behalf of Crimson Tide, I would like to wish everyone a "Merry Christmas and a Happy, Healthy and Prosperous New Year!" All the best in 2014!

A very promising young Smithbilt Molson female right from the 'heart' of the Crimson Tide program. Miss Tequila is as structurally sound and correct as they come; deep-bodied with a long hip; smooth-topped and wide from front to back. Tide 55X is wide based and strides well on an excellent set of feet and legs. An own-daughter of Smithbilt Molson 21M; Miss Tequila is an excellent example of what Molson is doing for our program! Combine this with the maternal side of her pedigree where you find sire figures like Stride, Romulus, Kalger, Siegfried, Baltimore and Balist along with maternal figures of G.G. Mitzi, Astine, Dundell Gerta, Dundell Patience, Millhill Flower and Toverberg Elsa; now you can appreciate the strength of her pedigree! Brian picked this young lady for Fullblood Perfection last year but we wouldn't part with her. He picked her again this year along with her calf, lot #60; how could we say no! Miss Tequila has two half sisters in our herd; one out of Jungle and the other out of G.G. Ferdinand. She also has a full sister working for Oakpark Farms in Illinois; who was the high seller in the 2010 Magnolia Classic. The embryo lot #64; is a full sib as well. All from a cow family that works; now that is consistency!

Exposed to Crimson Tide Rawlins from April 1 to August 2  
 Observed bred May 3. Confirmed safe on September 23

Wow! An awesome young female; "good to the bone!" Capacity and depth of rib second to none. Wide-topped, wide-based and long-hipped, walking on an excellent set of feet and legs. Conformation, chrome and confidence; this young lady is unstoppable with a pedigree to match! Influential sires include: Hodler, Solway Adonis, Baltimore, Molson, Stride, Balist, C&B Western, Siegfried, Romulus; and don't forget the maternal figures. Demby Herlinde, Jerico's Deirdre, G.G. Mitzi 11X, Toverberg Elsa, Celtic Maria, Millhill Flower; you can't ask for much more depth in lineage. Crimson Miss Jitterbug comes from a cow family that works; just look at her dam; TIDE 55X, lot #59 and her grandmother; RJMC 14T, the dam of the embryo lot #64.

Here is your opportunity to purchase one of the first two Jungle females offered for sale in Canada! A pair of top-end yearlings from the "heart" of our program; both heifers represent a different twist in genetics here at Crimson Tide. The introduction of King of Jungle da Zurita has worked well with the old German genetics Crimson Tide is known for. 110Z is a more moderate-framed female with a deep barrel and long rib; loose-hided and soggy, she is wide-topped, long-hipped and wide-based standing on an excellent set of feet and legs. From a pedigree standpoint you have the best South African genetics available from the sire; King of Jungle da Zurita, while the depth continues on the dam's side as well! Miss Mango has the influences of Molson, Horn, Heller, Antonius, and Gold along with Jerico's Deirdre, MFL Freya, MFL Brenda and MRLN Emily to mention a few.

115Z is a slightly larger-framed heifer; smooth topped, long hipped, long body and wide base with an excellent foot and leg structure. Both heifers are dark red, solid body pattern and double-goggled with lipstick. Very attractive and eye appealing! Again the best South African genetics from her sire; King of Jungle da Zurita. On her dam's side the influences are "second to none"; Salamon, Balist, Bold, Panzer and Salus. Maternal strength comes from such greats as: Minka, Traudl, Moranda, Rolling Hills Dana and the "immortal" Cregg Flanna cow. The outcome of this "genetic blending" has been phenomenal and exciting to say the least! Both of these heifers are full of milk, meat and muscle and offer up top level performance. All round; a pair of heifers with tremendous depth of pedigree and superior conformation. Bred "right for the times"; take a serious look at these two fancy young ladies and make your pick.

Having purchased the Canadian semen rights to Jungle; Crimson Tide Fleckvieh is excited to share these powerful and outstanding genetics with the industry. Out of the Zurita program from Brazil; Jungle is a sire to really pay attention to and get excited about! Jungle is no accident; he is the culmination of many years of breeding at Buzzard Hollow Ranch in Texas; along with the vast knowledge and experience of Fred Schuetze. Over 25 years of South African breeding at BHR has produced an outstanding pedigree; King of Jungle da Zurita encompasses the "best" South African genetics available today. Including: Haxold, Optimal, Evan, Pedodi, Hano, Sir Andi, Joecelynn, Lady Pretoria, Hadau, Hagen, Hero and Benz. Where do you stop? The list goes on! Deep bodied with a long full hip, wide-topped and sure-footed; Jungle is almost flawless and near perfect in conformation. This bull is a true curve bender and has the potential to be a real game changer in the Simmental breed. As well, his progeny will stop you in your tracks every time; making you sit up and take notice! "Eye Catchers" they are! Semen is FOB Bouchard Livestock

## Smithbilt Molson 21M

Offering 4 embryos. Guaranteeing 2 pregnancies if work is performed by a certified embryologist.  
FOB Kirkton Veterinary Service

Offering 4 embryos of Rolling Acres Tequila x Smithbilt Molson 21M; full sibs to TIDE 55X, lot #59. RJMC 14T is an excellent example of a consistent producing female and how you would expect a true "Herd Matron" to perform. A deep bodied, smooth topped, long hipped and structurally sound female with a wide base, walking on an excellent set of feet and legs. Tequila is a Stride daughter and a G.G. Mitzi 11X grand daughter; a combination that has worked well. With two daughters in our herd; one Jungle and the other G.G. Ferdinand, and two Molson daughters; one working for Oakpark Farms in Illinois, (TIDE 17U, the 2010 Magnolia Classic high seller), and the other lot #59 being offered here in Fullblood Perfection. Tequila has performed equally in our donor program; she truly is a "Foundation Female!"

The sire side of these embryos needs no introduction; a true sire in his own rite; Smithbilt Molson 21M: the "Female Maker!" A sire with structural correctness, pigmentation, calving ease and top milk production; you can't go wrong! This is evident by the performance of his progeny to date. With his influence being felt across North America in the Simmental breed; these embryos are "right for the times!"
